

See overleaf for additional notes on; fitting blinds to timber frames

1. Fitting tools required include star point screwdriver, scissors, drill & Ø2.5mm drill bit

2. Accessories pack (packing pieces as required)

3. Unclip trimcap on both sides

4. Using blind, mark positions for the cord grommet holes

5. With the drill at 90° to the surface, drill Ø2.5mm hole 1 off on each side

6. Attach double sided adhesive pad

7. Stick blind onto frame leaving rubber band around blind

8. Drill Ø2.5mm holes 2 off on each side

9. Hand screw fixings

10. Push cord knot into hole, push fixing grommet into hole, aligning groove to cord

11. Holding button, pull cord tight to secure

12. Remove rubber band. Carefully release locking gate. Pull cord to tension approx. equal on both sides

13. Press locking gate closed to secure cord. Cut-off excess cord leaving 100mm min. Tuck through hole in endcap

14. Clip on trimcaps.

15. If optional handle is required to be fitted, attach handle using pre-drilled holes and screws provided.

Fitting Blind to Timber Frames

a1. Fitting tools required include Ø4mm drill bit and star point screwdriver

a2. Mark position as outlined in step 8 (over leaf). Drill Ø4mm hole to depth of 10mm

a3. Screw in brass inserts until flush with timber surface

a4. Push cord knot into brass insert, push grommet into brass insert, aligning groove to cord

Continue as for PVC frames from step 11 (over leaf)
